

# LIFT-O-FLEX<sup>®</sup> *By* **Roni**

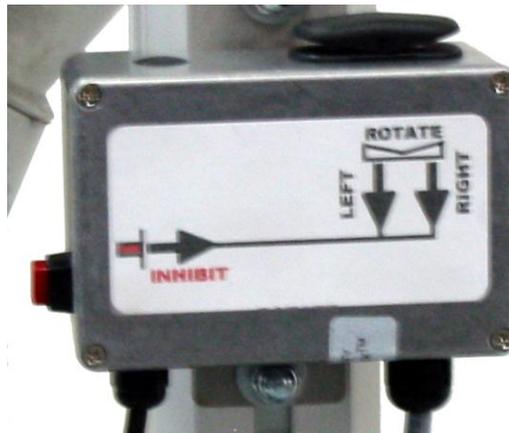

-“BRUTE” Rotating-  
19000 Series Lifter with Telescopic  
Mast-Pickup from Floor

The Lift-O-Turn™ end-effector can be equipped with different arms to handle various products that need rotating including “Brute” containers.

With the Lift-O-Turn™ incorporating a set of custom arms with retaining pins the handles on the container are engaged. The operator manually positions the pins prior to lifting the container. The retaining pins keep the container positioned during emptying or pouring operations.

End-Effector selection depends on load size and weight along with container contents.

The lifter can be provided with various options including scales.

Control Module

-Rotate Right/Left Push Buttons  
-“Inhibit” Button Activation Required Before  
Rotation of Pail

Optional Control Module:  
Joystick with variable speed control -Left”/”Right” only

**19260 Lift-O-Turn™**
